According to a long-standing belief, exceptional life-changing experiences are beyond the individual’s control—they ‘simply happen.’ However, individuals actively search for transformative experiences, inducing consciousness-alterations through practices and reflecting critically on the long process as ‘experientialist philosophers.’ The conference will devote itself primarily on theoretical questions involving these intentional practices that result in actively induced experiential states. As such, the aim is to add to our understanding of intentional transformative experiences.

- For this conference, digital participation is possible through Zoom
- For the link, registration is requested by 27th of August 2021 — contact sarah.perez@relwi.unibe.ch
- For organizational matters, contact bastiaan.vanrijn@relwi.unibe.ch or jens.schlieter@relwi.unibe.ch
